## NEWSLETTER

## SABA AND ITS PARTNER'S CONTRIBUTION TOWARDS ADVANCEMENT OF BETTER HIGHER EDUCATION IN THE FIELD OF ENGINEERING

### IN THIS ISSUE:

- Farewell Dinner Reception for the Outgoing Regional Director of Finnroad Ltd
- Delegates from Eastern Africa Countries Visit SABA Headquarters
- SABA and GUNT Conducts a Joint Business Promotion Tour in Fourteen Universities
- The Managing Director's Visit to Italy
- SABA Engineering PLC Participates on the Annual Conference of FIDIC in London
- SABA Provides In-house Trainings
- SABA Signs MOU with Suhura 571 PLC
- SABA Starts Supervision of Wukro – Adigrat - Zalambessa Road Project

### Vision Statement:

To be a dependable construction and consultancy Engineering service and product provider nationally and internationally

# Editor's Message

Dear readers first and for most please allow me to extend my seasonal greetings to our esteemed customers, staff, management members, business partners and shareholders of SABA Engineering PLC.

Wishing its readers a Merry Christmas and a Happy New Year 2010 G.C, this issue contains a series of informative news articles on the major activities of SABA Engineering in the last four months. The publisher has

made a focused effort to present an in-depth coverage of the main accomplishments of the Company in the reporting period. Included among these events are various in-house capacity building trainings provided by SABA to upgrade the skill of our employees and East African business delegates visit in SABA.

The GUNT&SABA joint business promotion tour in fourteen universities in Ethiopia is the cover story of this edition.

The visit of Managing Director Eng. Samson Bekure to SIMEM S.r.l in Italy, the signing of a MOU with ALPI De.Co. S.r.l and SABA's participation in international meetings as well as a farewell program for the outgoing Finnroad Regional Director are all included

in this edition. This edition also lists SABA's ongoing and notable completed projects in the year 2002 E.C / 2009 G.C to give you up-to-date information.

Wishing you all a Merry Christmas and a Happy European New Year once again we express our hope that you will enjoy reading this publication and help to improve future issues by your contributions.

Please send us your views observations and comments, if any, using the editor's email address shown below.

*Enjoy the newsletter!*

## Farewell Dinner Reception for the Outgoing Regional Director of Finnroad Ltd

*Partial view of the dinner reception*

*Finnroad - SABA meeting at SABA Conference Hall*

A farewell dinner reception was held for Mr. Pekka Kosonen, the outgoing Regional Director of Finnroad Ltd on December 03, 2009. On this occasion His Excellency Mr. Leo Olasvirta, Finland's Ambassador to Ethiopia along with Mrs. Leo Olasvirta, Mr. Pekka Kosonen, Regional Director, Mr. Ari Kalliokoski, the new Regional Director and Mr. Markku Pispannen, Regional Manager

of Finnroad Ltd attended the program. Management members of SABA Engineering PLC and SABA's subsidiary companies: Addis Block Production S.C, and Bolebulbula Construction Stone Production S.C., as well as invited guests also attended. In his opening remarks, Managing Director Engineer Samson Bekure welcomed the new Regional Director of Finnroad Ltd while

wishing the outgoing director good luck in his future endeavors.

The next day, December 04, 2009 a meeting was held at SABA conference hall between SABA and Finnroad. The main issues discussed were progress and the challenges currently being faced in executing Finnroad - SABA road projects, future business relations between SABA & Finnroad and other related issues. The meeting concluded with the observation that Finnroad and SABA had enjoyed good relations for the past ten years. It was decided that both firms would continue working together in the future in the same manner. Specifically, Finnroad and SABA will focus and join hands on NDF-Financed projects in Ethiopia, Tanzania, Uganda, and Rwanda and elsewhere that Finnroad has a competitive advantage in this partnership.

## Delegates from Eastern Africa Countries Visit SABA Headquarters

*While the Ugandan delegates visitig SABA's Material Testing Laboratory*

*Engineer Garedew Asfaw, Deputy Managing Director for Operations briefing the Sudan delegates about SABA's business activities*

Delegates of the Uganda National Roads Authority (UNRA) Mr. David Luyilazi, Planning Director; Dan Mugura, Procurement Manager; Justine Ongom, Road Maintenance Manager and Giles Odongo, Principal Quantity Surveyor of Ministry of Works and Transport visited SABA headquarters on September 24, 2009. A briefing session was held for

the guests in SABA Conference Hall during which Managing Director Engineer Samson Bekure warmly welcomed the guests, acquainted them with the activities of SABA Engineering PLC, and offered a consideration as to how to strengthen the business activities established in Uganda. During this meeting a fifteen minute corporate video

film (extracted from recently recorded documentary film) was displayed portraying all activities of SABA Engineering PLC including the subsidiary companies.

The guests then toured SABA headquarters along with Engineer Samson Bekure, Managing Director and Engineer Getahun Endale, Delegate to the Managing Director. The visit concluded with a dinner reception at one of the cultural restaurants.

In related news, another team of delegates from the Sudan National Highway Authority visited SABA Headquarters on October 6, 2009. This team was comprised of high officials and resident engineers who met with SABA Management members when Engineer Garedew Asfaw, Deputy Managing Director for Operations welcomed all and presented an overview of SABA Engineering PLC for the guests which was followed by a fifteen minute corporate video film. The guests discussed SABA's previous initiatives providing engineering services in the Sudan as well as SABA's plans in the Sudan for the future. The guests then toured SABA's headquarters expressing their appreciation on the spot for the institutional capacity of SABA Engineering PLC. A closing luncheon program was held for the guests at the Crown hotel.

*SABA management members on a meeting with the Kenyan delegates*

In addition, a business delegation led by Engineer Asfaw Kidanu ILO Chief Technical Advisor from Kenya visited SABA headquarters

on December 07, 2009 to assess SABA's organizational capability. This team consisted of five members from Kenya Rural Roads

Authority as well as a delegate from one of the private consulting companies. During this time Engineer Samson Bekure briefed the visitors on SABA's business activities. Besides, the guests discussed future business with SABA's management members. The corporate video film was also shown for the guests. Engineer Samson Bekure, Managing Director provided a tour for the guests. During the lunch reception one of the private companies managing directors expressed interest in working with SABA through a joint venture partnership. Contact details were exchanged for further discussion on this possibility.

## **SABA and GUNT Conducts a Joint Business Promotion Tour in Fourteen Universities**

*Mr. Köksal Dogan GUNT's Area Sales Manager giving presentation at Gonder University*

SABA Engineering PLC and G.U.N.T. Gerätebau GmbH conducted a joint Business Promotion Tour of fourteen

universities from October 12th to November 3rd, 2009 in different regional states of Ethiopia. GUNT is a "cutting-edge"

Engineering Education Equipment manufacturing company based in Hamburg, Germany. SABA is the sole agent for GUNT in Ethiopia.

## SABA NEWS

GUNT/SABA business relations began in mid-May 2003. GUNT authorized SABA as its local agent in August of 2003. The two companies have been working together as a sound business team ever since.

In a follow-up of current GUNT product range marketing strategy, SABA proposed to introduce GUNT products to the

new thirteen regional universities by way of personal visits through October to December, 2009. GUNT accepted the proposal and recommended to include the existing universities in the tour providing updates about new products. SABA learned from the Ministry of Education which of the thirteen universities had already Engineering departments. SABA sent letters to all the universities

requesting for appointments and accordingly a detailed itinerary was scheduled. The GUNT and SABA Team included Mr. Heiko Lentfer, Director of Business Development of GUNT and Mr. Köksal Dogan, GUNT's Area Sales Manager, Ato Thomas Lulseged, Public Relations Service Head and Ato Madefrot Tilahun, Foreign Trade Expert from SABA made a tour and promoted business at fourteen universities: Debreberhan, Wollo, Mekelle, Axum, Gonder, Bahirdar, Debremarkos, Nekemte, Jimma, Addis Ababa, Hawassa, Arbaminch, Adama and Diredewa Universities.

The promotion team made presentations about the products and services of both companies at all the universities they visited. Discussions followed afterwards in which Ato Mandefrot Tilahun, the representative for the team fielded all the questions raised at each university.

The mission was a great success, and the team was welcomed warmly at all the universities visited.

The editor of this newsletter would like to express his gratitude on behalf of the team to each university for its warm welcome and cooperation enabling us accomplish our task successfully. We are also very grateful to almighty God for the roads we traveled safely during the tour that covered about 5000 kms.

# The Managing Director's Visit to Italy

*A group picture with SIMEM's officials at SIMEM head office*

*Engineer Samson Bekure exchanging the signed MOU with Alpi De Co Managing Director*

Managing Director Engineer Samson Bekure made a business trip to Italy between October 13th and October 17th, 2009 to accomplish various tasks consolidating the company's position in relation to cooperation with the European firms. The trip was specifically set to address the following:

1. 15 Towns Water Supply and Sanitation Projects Tender,
2. Finalization and Signature of.

3. MOU with Alpi De Co, and
4. Familiarization & acquaintance of manufacturers of machinery for production of various types of terrazzo tiles.

Having purchased the bid document for the Ministry of Water Resource's 15 town water supply and sanitation project financed by the EU, SABA embarked on looking for a reliable partner from member states of the European Union as per the

terms stated in the bid document.

In close collaboration with and valuable assistance from a friend and a strategic business partner, Engineer Mulugeta Zeleke, owner and founder of Lion Group, USA, communication was established between SABA and SIMEM, an Italian Company which has had extensive experience in water supply and treatment business.

In order to finalize the issue of participation in the bid as well as future business opportunities, the parties agreed to meet at SIMEM's head office in Verona. Representatives from SABA (Engineer Samson Bekure) from Addis Ababa, Ethiopia, and Lion Group (Eng. Mulugeta Zeleke) from Atlanta, USA, subsequently traveled to Italy and held an invaluable meeting from October 13th to October 15th, 2009.

Although circumstances proscribed reduced participation (one lot out of four), the parties were successful in setting up a foundation for future cooperation. Managing Director Mulugeta Zeleke also heads the local construction company Genet Construction that is an outlet for the envisioned corporation.

The managing director of SABA, Engineer Samson Bekure also signed a MOU with ALPI De.Co. S.r.l., an Italian construction company specializing in

foundation works, slopes protection and consolidation works. Alpi De. Co, having its head office in Belluno, Italy, via dell'Artigianato, 24, had made a visit to SABA's Head Office earlier expressing interest for close association with our company. With the exchange of draft documents and opinions the two

parties put their official signatures on the document during the MD's visit previously mentioned.

Managing Director Engineer Samson Bekure also took the opportunity to visit Longinotti Group S.R.L. a manufacturer of machinery used to make terrazzo tiles. On October 15th ,2009

the managing director headed to Freinthe, Italy, to get first-hand information about this highly-reputed Italian manufacturing company. Longinotti Group S.R.L will be a strategic partner with SABA Engineering PLC which owns Addis Block S. a subsidiary company that produces a variety of terrazzo tiles.

## SABA Engineering PLC Participates on the Annual Conference of FIDIC in London

The FIDIC annual conference was held in the city of London between September 13th and September 16th of 2009. SABA Engineering Plc participated on the conference as a member of

challenges. The aim is to identify and plan the actions needed to position the consultancy and engineering industry as a leader in providing viable and effective solutions.

the Queen Elizabeth II Conference Centre.

Under the theme Industry Challenges and Responses, the business program got underway with leading personalities reviewing the global challenges and the need for action.

Monday afternoon's three parallel business sessions address the plenary theme in more detail. To encourage participation and discussion, following comments by panelists, the floor was turned over to the participants.

Under the theme Geographic and Sector Hot Spots, the Tuesday morning's plenary session examined regions and sectors where there are the best opportunities for our industry to lead. The business sessions that followed focused on specific regions and sectors needing massive investments in infrastructure.

On Tuesday afternoon, business

FIDIC. Engineer Petros Abebe, Head of the Contract Formulation and Supervision Department attended the conference representing SABA.

FIDIC 2009 London explored the role of engineers in the delivery of sustainable solutions to our global

FIDIC 2009 London began with a welcoming reception in the historic Royal Courts of Justice on Sunday evening, 13th of September, 2009. Her Royal Highness Princess Anne was the invited guest of honor for the opening ceremony on Monday, 14th September 2009, held in

sessions explored how to create A More Agile, Responsive, High Profile Industry to ensure that managing directors take the lead in solving the global challenges.

Wednesday morning focused on the role of the FIDIC, its members associations and firms in positioning the engineering community to be at the forefront of delivering sustainable solutions to global challenges. Speakers reviewed what the industry is currently doing, is planning to do,

and should be doing to ensure that managing directors will lead the way.

The FIDIC General Assembly Meeting occurred on Wednesday afternoon followed by the closing gala banquet in the Great Room of the Grosvenor House Hotel on Park Lane.

The following summary was provided as part of final conference report to member companies:

- Manage integrity and values

formally,

- Train and invest in people, especially future Managing Directors,
- Put ideas into practice – “walk the talk”,
- Engage with politicians and the public,
- Educate all aspects of society, and
- Invest in research and thought leadership Support and promote member association and FIDIC.

## SABA Provides In-house Trainings

*Engineer Samson Bekure giving the training for the attendees*

SABA has been providing in-house training for its management and staff members on various subjects at different occasions. The first training provided in the last four months was on topics mainly dealing with various techniques of Geotechnical (sub-surface) Investigation and material testing including technical report writing. The Geotechnical Engineering Department

arranged the training which is intended to up-grade the capacity of its staff's technical expertise and skill of technical report writing. The training program and outlines including the training manuals have been prepared by the Geotechnical Engineering Department of SABA Engineering PLC in close collaboration with Engineer Samuel Tadesse, P.h.D. who gave the training for two

weeks beginning September 7th 2009. Although the training was initially targeted only for Geotechnical Engineers and Geologists, the decision was made to include Civil Engineers from other departments. All together a total of twenty employees participated. As per the training program, training manuals have been provided to all participants. Attendees commented that the training was very helpful in refreshing their skill and expertise pertaining to geotechnical investigation and material testing works. They added that such training should also extend to other practical areas of the profession.

The second training provided was on tender document preparation. Managing Director Engineer Samson Bekure gave the training to all management members and appropriate staff on

*Engineer Hayerdin Mohammed giving opening speech on the starting day of the training*

*The Geotechnical Investigation training at SABA Conference Hall*

September 29th, 2009 for SABA and its subsidiary companies: Addis Block Production S.C and Bolebulbula Construction Stone Production S.C. Ato Seifu Eshete, Planning and Monitoring Service Head coordinated the training. The training emphasized that tender preparation is one of the core activities of the company which determines the fate of the company. This training involved discussions with the attendees that included bid preparation procedures and checklist, bid submission deadlines, bid confidentiality, and other related topics.

The last two trainings held in SABA Conference Hall were arranged by the design department. The first one was on bridge management support systems, and intended to be an introductory training for the implementation of bridge management support system (BMSS) projects.

SABA Engineering PLC has been contracted by the Ethiopian Roads Authority (ERA) to provide consultancy services for the Bridge Management System Support in the districts of Alemgena, Diredawa, Shashemene and Soddo.

The contract was signed on May 27 and it was begun on July 2009. In a bid to facilitate the implementation of the multitasked assignment, SABA's senior engineers underwent an intensive two-day introductory training under the instruction of a senior bridge expert. This session was held on November 10 and 11, 2009. Subsequently the trainees will train their subordinate junior engineers and bridge experts who will be actively involved in project implementation. The knowledge acquired from the training is also expected to be passed on to ERA district staff that will partake in the project implementation.

The second training was a surveying training, and held in the SABA Conference Hall for two weeks beginning November 10th, 2009. The aim of this training was to build the capacity of the assistant and junior surveyors, and to refresh the knowledge of the senior surveyors. It also helped them to create a standard professional way of conducting field surveying work. Engineer Hayerdin Mohammed, the Design Department Head made an opening speech stressing that surveying work is the most necessary and prime task in the road design and construction works. He added that as a result the task should be carried out with high care, diligence and competency that is why the training is needed. In-house senior surveyors gave the training for about seventeen surveyors in two parts: theory and practical.

## SABA Signs MOU with Suhura 571 PLC

*W/ro Suhura Ismael, General Manager of Suhura 571 PLC and Engineer Samson Bekure pausing for a picture after signing the MOU*

SABA signed a memorandum of understanding (MOU) with Suhura 571 on October 12, 2009 at SABA conference hall. It establishes a mutually beneficial business relationship by forming a Joint Venture Agreement on a project-to-project basis by bringing the capital, expertise, equipment and experiences of each party together in the areas of drilling, engineering, supply and construction services in Somali Regional State in particular and also in the other parts of Ethiopia as well as in other countries as appropriate.

## SABA Starts Supervision Work for Wukro – Adigrat - Zalambessa Road Up-grading Project

*The Supervision work in progress*

The Government of Ethiopia obtained funds from the Kuwait fund for Arab Economic Development toward the cost of constructing the Wukro-Adigrat-Zalambessa road upgrading project. SABA Engineering PLC in association with Gondwana Engineering

PLC was awarded the consultancy services for the construction supervision of this project. Ethiopian Roads Authority is the employer, while China Railway No. 3 Engineering Group Co. Ltd (CRTG) is the contractor. The contract agreement for the

consultancy services for the construction supervision of the project was signed on May 7, 2009. The contract commencement date is June 22, 2009 and the contract completion date is December 22, 2011.

The project is located in the Northern part of Ethiopia in Tigray regional state. The project road starts at the Northern outskirts of Wukro town, which is located about 870 km North of Addis Ababa. The total length of the project is 96 km with the Northern project limit approximately 3.6 km before the town boundary of Zalambessa town.

# List of Ongoing & Notable Completed Projects

## Design Department

- Consultancy Services for the Feasibility Study, Environmental Impact Assessment (EIA) (Phase I) and Detailed Engineering Design and Tender Document Preparation (Phase II) for the rehabilitation of Ageremariam – Moyale Road Project in association with AIC PROGETTI SpA, SPTSpl and MGM Consult PLC, 300km Oromia National Regional State, Ethiopia (Near to Completion).  
**Client: Ethiopian Roads Authority**
- Consultancy Services for the Review of Feasibility Study, Review of Environmental Impact Assessment (EIA), (Phase I) Detailed Engineering Design and Tender Document Preparation (Phase II) for Awash – Dofen – Kassamender Road Projects, 300 km, Afar National Regional State, Ethiopia. The Lead Consultant is Finnroad Ltd of Finland (Near to Completion).  
**Client: Ethiopian Roads Authority**
- Consultancy Services for Feasibility Study, EIA, (Phase I) Detailed Engineering Design and Tender Document Preparation (Phase II) for Ankober – Aliyuamba-Awasharba Junction Road Project, 92 km, Afar and Amahara National Regional States, Ethiopia. The lead consultant is Finnroad Ltd of Finland (Recently completed).  
**Client: Ethiopian Roads Authority**
- Consultancy Services for Feasibility Study, EIA, (Phase I) Detailed Engineering Design and Tender Document Preparation (Phase II) for Sawla - Maji Road Project, 180 km, Southern People Nations and Nationalities Regional State, Ethiopia. The first phase of the project is completed. The second phase is substantially completed. The Lead Consultant is Finnroad Ltd of Finland.  
**Client: Ethiopian Roads Authority**
- Consultancy Services for Feasibility Study, EIA, (Phase I) Detailed Engineering Design and Tender Document Preparation (Phase II) for Gog – Akobo Road Project, 203 km, Gambela National Regional State, Ethiopia. The first phase of the project is completed. The second phase is underway. The Lead Consultant is Finnroad Ltd of Finland.  
**Client: Ethiopian Roads Authority**
- Consultancy Services for Detailed Engineering Design for Chole – Magna Section of Dera – Magna Road Project, 21 km, Oromia National Regional State, Ethiopia (near completion).  
**Client: Ethiopian Roads Authority**

- Consultancy Services for Feasibility Study, EIA, (Phase I) Detailed Engineering Design and Tender Document Preparation for Mekele – Abi Adi – Adwa Road Project, 21 km, Tigray National Regional State, Ethiopia. The Lead Consultant is COWI Consult of Denmark (The first phase completed and second phase is substantially completed).  
**Client: Ethiopian Roads Authority**

## Contract Formulation & Supervision Department

- Consultancy Services for the Construction Supervision of Woreta – Gobgob, lot I (Woreta - km 49) Road Upgrading Project, Amhara National Regional State, Ethiopia (Near to completion).  
**Client: Ethiopian Roads Authority**
- Consultancy Services for the Construction supervision of Shire – Adigoshu Road Upgrading Project, Tigray National Regional State, Ethiopia.  
**Client: Ethiopian Roads Authority**
- Consultancy Services for the Construction Supervision of Assela –Dodola Road Upgrading Project, Oromia Regional State, Ethiopia (The lead consultant is Finnroad Ltd of Finland).  
**Client: Ethiopian Roads Authority**
- Consultancy Services for the Construction Supervision of Wacha – Maji Road Upgrading Project, Southern People Nations and Nationalities Regional State, Ethiopia.  
**Client: Ethiopian Roads Authority**
- Consultancy Services for the Construction Supervision of Debretabor Town Internal Roads Project, Amhara Regional State, Ethiopia.  
**Client: Debretabor Town Administration**
- Consultancy Services for Design review and Construction Supervision of 21 Bridges in North Western Uganda. The Design review has been concluded. the supervision work will be started after finalizing with the contractors.  
**Client: Republic Of Uganda Ministry of Works and Transport.**
- Consultancy Services for the Construction Supervision of Metu - Gore Road Upgrading Project, Oromia Regional State, Ethiopia.  
**Client: Ethiopian Roads Authority**

# List of Ongoing & Notable Completed Projects

- Consultancy Services for the Construction Supervision of Werabelle River Bridge Project, Oromia Regional State, Ethiopia.  
**Client: Ethiopian Roads Authority**
- Consultancy Services for the Construction Supervision of Gergera River Bridge Project, Tigray National Regional State, Ethiopia.  
**Client: Ethiopian Roads Authority**
- Consultancy Services for the Construction Supervision of Wukro-Adigrat-Zalambessa Road Upgrading Project Tigray National Regional State, Ethiopia (Recently commenced and on progress).  
**Client: Ethiopian Roads Authority**
- Consultancy Services for the Bridge Management Support Lot1: Alemgena, Soddo, Shashemne and Diredawa Districts, Ethiopia.  
**Client: Ethiopian Roads Authority**

## Geo-technical Engineering Department

# Quality Policy

*SABA Engineering PLC is committed to satisfy customers' needs and expectations by providing timely quality service.*

*The Management and Employees' commitment to continuous improvements and meeting customers' expectation is the foundation for achieving our quality objectives*

# የጥራት ፖሊሲ

ሳባ ኢንጅነሪንግ ኃ.የተ.የግ.ኩ.  
ወቅቱንና ጥራቱን የጠበቀ  
አገልግሎት በመስጠት የደንበኞቹን  
ፍላጎት ለማርካት በቁርጠኝነት  
ይሠራል።

የማኔጅመንቱና የሠራተኛው  
ቀጣይነት ላለው የአገልግሎት  
መሻሻል እና የደንበኞች ፍላጎት  
እርካታ በጋራ መነሳሳት ድርጅቱ  
ላስቀመጣቸው የጥራት ዓላማዎች  
መፈጸም ዋና መሠረት ነው።
